PROFESSIONAL SUMMARY

Full-Stack Software Engineer with hands-on experience designing, developing, and deploying scalable web applications across modern frontend and backend technologies. Skilled in building secure APIs, optimizing databases, integrating enterprise systems, and developing cloud-ready applications using modern development frameworks.

Experienced working in Agile and collaborative engineering environments with exposure to DevOps workflows, Docker-based deployments, monitoring systems, and secure software development practices. Combines strong software engineering capabilities with a cybersecurity-focused mindset to deliver reliable, maintainable, and production-ready solutions.

TECHNICAL SKILLS

Frontend Development

- React.js
- Next.js
- Vue.js
- HTML5
- CSS3
- JavaScript

Backend Development

- Node.js
- Express.js
- FastAPI
- Django
- Flask
- RESTful API Development
- Authentication & Authorization

Databases

- PostgreSQL
- MongoDB
- MySQL

DevOps & Tools

- Git & GitHub
- Docker
- CI/CD Concepts
- Linux (Ubuntu & Debian)
- Prometheus
- Grafana

Cybersecurity & Systems

- Secure Coding Practices
- Endpoint Security (Sophos)
- Security Monitoring & Log Analysis
- Vulnerability Awareness & System Hardening
- Secure API Communication

Networking

- TCP/IP Fundamentals
- DNS & DHCP
- Subnetting Basics

PROFESSIONAL EXPERIENCE

Software Developer (Part-Time, Remote)

Synthahub, Nairobi

June 2025 – Present

- Developed scalable backend systems using Node.js, FastAPI, and Django for production-ready applications.
- Designed and implemented secure RESTful APIs with authentication, validation, and data protection mechanisms.
- Structured and optimized PostgreSQL and MongoDB databases for performance, scalability, and reliability.
- Containerized services using Docker and supported CI/CD workflows for streamlined deployments.
- Implemented monitoring and observability solutions using Prometheus and Grafana to track system health and performance.
- Collaborated in distributed engineering teams using Git-based workflows and Agile development practices.
- Contributed to backend architecture decisions and system optimization initiatives.

IT & Cybersecurity Intern

Royal Media Services (RMS), Nairobi

January 2026 – April 2026

- Troubleshoot hardware, software, and network issues to improve operational reliability and uptime.
- Monitored and responded to security events using Sophos and Octopus monitoring tools.
- Supported IT infrastructure operations and system performance monitoring.
- Participated in workflow optimization, documentation, and technical support activities.
- Assisted in maintaining secure and stable enterprise technology environments.

PROJECT EXPERIENCE

Sazara POS System – Full-Stack Web Application

<https://sazara.co.ke/>

- Designed and developed a scalable Point of Sale (POS) platform using React, Next.js, and FastAPI.
- Built secure authentication and transaction-handling systems to ensure data integrity and reliability.
- Architected backend services and optimized database interactions for real-time operational performance.
- Integrated RESTful APIs to enable seamless communication between frontend and backend systems.
- Containerized application services using Docker to support consistent deployment environments.
- Successfully deployed a production-ready application supporting real-world business operations.

CMS Interaction Tracking Optimization – Royal Media Services

- Optimized interaction tracking systems within a Content Management System (CMS) environment.
- Identified and refactored inefficient $O(n^2)$ processing patterns to improve application performance.
- Applied pre-aggregation techniques to reduce database load and improve query efficiency.
- Implemented batching and concurrency optimization strategies to enhance throughput and scalability.
- Improved performance reliability for large-scale interaction processing workflows.

EDUCATION

Bachelor of Science in Information Systems and Technology

United States International University – Africa (USIU-Africa)

Specialization: Forensics & Cybercrime

CERTIFICATIONS

- Software Developer Certificate – PLP Africa (2025)

ADDITIONAL STRENGTHS

- Agile Development Practices
- Cross-Functional Team Collaboration
- Problem Solving & Analytical Thinking
- Technical Documentation
- System Optimization & Performance Tuning
- Secure Software Development
- API Integration & Systems Integration
